

AI Powered Advanced Stocks Analysis Software

BETA TESTER QUICK START GUIDE

Welcome !!!

Thank you for helping test our AI-powered stock analysis platform.

5-MINUTE QUICK START

Step 1: Open the Platform

👉 URL: <https://analyzestocks-beta.streamlit.app>

Username and password fields are fillers only. Use anything ...

Step 2: Try Your First Analysis

1. You'll see a search box or stock input field
2. Type a stock ticker (try AAPL, NVDA, or TSLA)
3. Click "Analyze" or press Enter
4. Wait 5-10 seconds for analysis to load

Step 3: Explore the Results

You'll see:

- TR Indicator Stage (our proprietary trend classifier)
- AI Confidence Score (how confident our AI is about patterns)
- Chart with signals
- Pattern Detection results

🎉 **You're up and running!**

UNDERSTANDING THE TR INDICATOR

The TR (Trend Recognition) Indicator classifies stocks into 6 stages:

Stage 2+: **STRONG BUY**

- Best time to buy - Powerful uptrend
- Strong momentum, volume confirmation
- Highest probability of gains

Stage 2: **BUY**

- Confirmed uptrend
- Good for new long positions
- Rising prices with support

Stage 1: **BASING (Neutral)**

- Accumulation phase
- Building foundation for next move
- Watch for breakout

Stage 3: **TOPPING (Neutral)**

- Losing momentum
- Distribution phase
- Consider taking profits

Stage 4: **SELL**

- Confirmed downtrend
- Exit long positions
- Declining prices

Stage 4+: **STRONG SELL**

- Steep decline
- Avoid or short opportunity
- Highest probability of losses

AI CONFIDENCE SCORES

Our machine learning models predict pattern success rates:

- Very High (90-100%): Rare, strongest setups - Act with confidence
- High (75-89%): Good probability - Reliable signal
- Moderate (60-74%): Decent probability - Use caution
- Low (Below 60%): Use extra caution - Higher risk

Our Model Accuracy: 91.5% on daily timeframes, 81.8% on weekly

KEY FEATURES TO TRY

1. Stock Analysis Page

- Single stock deep-dive
- TR Indicator + AI confidence
- Chart patterns detected
- Entry/exit recommendations

2. Daily Trading Guide

- Market overview updated daily
- Top opportunities across market
- Pre-filtered by TR stages and AI confidence
- Quick actionable insights

3. Watchlists

- Create custom lists of stocks you're watching
- Bulk analyze entire watchlist at once
- Sort by TR stage, AI confidence, patterns
- Save and manage multiple watchlists

4. Pattern Detection

- Identifies 10+ chart patterns including EMA cross-over, Ichimoku Cloud and SuperTrend
- Each with AI confidence score
- Entry, target, and stop-loss levels

5. Multi-Timeframe Analysis

- Daily, Weekly, and Monthly views
- Stronger signals when timeframes align
- See the big picture

TROUBLESHOOTING

"I need to click buttons twice"

This is a known quirk we're fixing!

- First click: Initializes the page
- Second click: Actually runs the analysis
- Just click twice on first page load

"Stock not found"

- Check ticker spelling (use symbols, not company names)
- Try company name search if ticker doesn't work
- Some OTC/penny stocks may not be available

"Slow loading"

- First analysis takes 5-10 seconds (data fetching)
- Subsequent analyses are faster (cached)
- Check your internet connection

SYSTEM REQUIREMENTS

Browsers (Recommended):

-  Chrome 90+ (best performance)
-  Firefox 88+
-  Safari 14+
-  Edge 90+

Devices:

-  Desktop/Laptop (Windows, Mac, Linux)
-  Tablets (iPad, Android)
-  Smartphones (works, but desktop experience better)

No Installation Required!

- No downloads
- No programming knowledge needed
- No API keys required
- No credit card during beta

KNOWN ISSUES (We're Fixing!)

5. Double-click required on first page load
6. Occasional slow loading when fetching fresh data
7. Some buttons may need a second click after page refresh

Please report any other bugs you find!

THANK YOU!

As a beta tester, you get:

-  Early access to new features
-  Direct influence on product direction

FUTURE ENHANCEMENTS:

Following features are in pipeline:

- TR Indicator Scan (Daily / Weekly together) on a watchlist
- More built-in
- Heat Maps
- Alerts (send emails on price movements)
- Real-Time or delayed paid data. Currently data is being taken from Yahoo Finance which is free but there are reliability issues and no support.
- Portfolio Management

NEED HELP?

Support Email: support@analyzestocks.net

Response Time: Within 1-2 business days

Beta Testing Period: Now till December 15, 2025

LET'S GET STARTED!
